IPCAI 2019
Information Processing in Computer Assisted Interventions

June 18-19, Rennes - France

|	
Intention to submit:	October 26, 2018
Paper submission:	November 2, 2018
Abstract submission	January 11, 2019
Author notification	February 1, 2019

www.ipcai.org

TOPICS:

- *Surgical data science*
- *Interventional imaging*
- *Systems and software*
- *Evaluation and validation*
- *Augmented reality for medical applications*

- *Surgical planning and simulation*
- *Tracking and navigation*
- *Interventional robotics*
- *Surgical skill analysis and workflow*
- *Advanced intra-operative visualization and user interfaces*

NEW for 2019: For the first time, IPCAI will provide an opportunity for the CAI community to showcase scientific breakthroughs and novel ideas. Authors will be able to submit Long Abstracts to be presented as oral and poster presentations at IPCAI. The focus of these Long Abstracts will be on:

- Exciting new breakthroughs relevant to IPCAI or,
- Novel ideas with preliminary but limited experimental validation.

Long Abstracts will be peer-reviewed based on novelty and potential interest to the IPCAI audience. Another call with details will follow closer to the Long Abstract deadline of January 11.
